

Habitats and the Local Environment - Get Creative!

A plant or animal's home is called a **habitat**.

Trees like the mulberry tree at Hogarth's House are home to lots of different animals, including insects and birds.

The mulberry tree is a good home for insects and birds because it keeps them warm and safe and also offers lots of food to eat!

Think about it.

What is your habitat?

How do you keep warm from the cold?

How do you find food?

What do you have to help you sleep comfortably?

Your turn! Draw a picture of your home

Make sure your picture includes:

**Something that
keeps you warm**

**Somewhere you
keep food**

**Somewhere you
sleep**

Add it to our gallery! Ask an adult to share a picture of your work on social media using [#HogarthAtHome](#)
