

## Habitats and the Local Environment - Get Creative!

A plant or animal's home is called a **habitat**.

Trees like the mulberry tree at Hogarth's House are home to lots of different animals, including insects and birds.

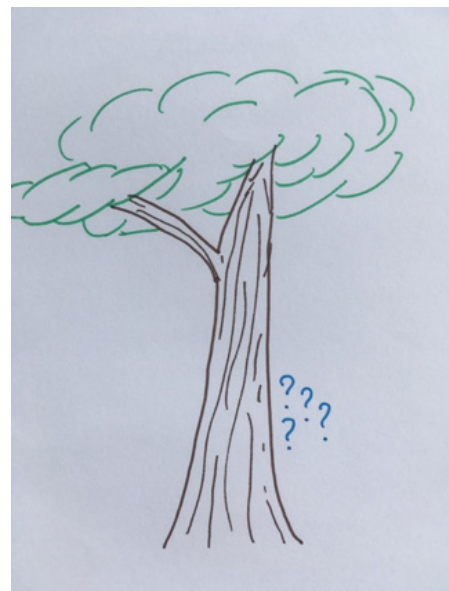

### Pretend you have discovered a new animal behind a tree!

- How many legs has it got?
- Can it fly?
- What does it eat?
- How does it keep warm?
- Where does it sleep?

Draw your animal or look through the recycling box to find things to make your new animal with!

Don't forget to give your animal a name!

### Think about it.

Why is a tree a nice home for your animal?

**Add it to our gallery!** Ask an adult to share a picture of your work on social media using **#HogarthAtHome**
